**** Start with the Base Rack Assembly and Build a Kayak/SUP Storage Rack to Fit Your Specific Needs ****

No more lugging around your heavy kayak or paddleboard after a long day on the water. With Magma's new Kayak/SUP Dock Storage Rack System your problems are solved.

Building the rack system is simple; start with the base rack, R10-1001, and purchase the specific arms separately that best fit your needs. Rack arms (sold separately) are constructed from 304 Mirror Polished Marine Grade Stainless Steel and are available in either straight, 36" x 1-1/2" Dia., R10-1010-36, for Kayak's, or angled, 1" Dia., R10-1020, for SUP's/Board's. Fully assembled this rack holds up to 4 Kayaks and 5+ SUP's or a combination of both.

The base rack assembly is designed to be mounted directly to a dock or floor and has been constructed from 1-1/2" Dia. 304 Mirror Polished Marine Grade Stainless Steel tubing with 356 Anodized Aluminum connection joints. Each vertical uprights has (30) adjustment holes spaced 2" apart for proper spacing between any size boats/boards or water toys. Base rack and all arms come with pre-installed UV resistant polyethylene foam padding. Each arm has a tie-down point allowing use of securing straps when equipment is stored or simply use a cable lock to safely secure items to the rack. Whether you're new to water sports or a seasoned veteran this rack system is a must have for every paddling enthusiast.

Application

Dock / floor mounted Kayak / SUP storage rack
