

800 series ANTENNA INSTRUCTIONS

VHF Connection

The SO-239 connector is ready to accept standard PL-259 connector. Quality marine cable such as RG8X, RG8, or RG213 should be used to connect to SO-239 connector.

Cellular Connection

High frequency 'N' type female connector is ready to accept a 'N' type male connector. Quality marine cable such as DA340, RG8, or RG213 with appropriate adapter should be used to connect to the 'N' type connector.

F114 (Mounting ferrule included)

Attaches 800 series antenna with 1-14 male threads to a mount with standard 1-14 male threads

A mild boat wash & wax should be used to keep your antenna looking like new. Never use ammonia, paint or cleaning solvents, or adhesive caulking; they will harm the finish of the antenna. Every antenna is backed by a 5 year limited warranty. Our customer service Dept. welcomes any comments. Please contact them at (954) 747-7022.
